

CFA Society Minnesota is dedicated to being a trustworthy source of information for investment professionals in the Twin Cities, as well as the entire Midwest five-state region. To this end, we are proud to again offer our annual Financial Compensation Survey. Now in its second year, the results of this market research provide a regional-specific analysis of compensation levels for investment and financial professionals.

Following the widely successful survey launch in 2013, we are excited to share the results of the CFA Society Minnesota 2014 Financial Compensation Survey. With two years of data under our belts, we are now able to show year-over-year comparisons. Eventually, we can begin to identify trends, and start to paint a comprehensive picture of compensation in our region. The following pages will share the key data points gathered this year, initial trend analysis and cross-correlations.

For those who participated in the survey, I want to personally thank you for helping to create this beneficial set of data. I trust you will agree to the indispensable value this market research yields.

Regards,

President, CFA Society Minnesota

## Executive Summary

Trend analysis is a critical job requirement for most successful financial and investment professionals. From year-over-year comparatives to correlative associations, the ability to analyze data and identify unique traits is important in a rapidly evolving market. The same holds true in the highly competitive investment job market.

> This primary research examines the impact of variables (e.g., tenure, title, CFA designation, education, et al.) on compensation levels.

Given the imperative to accurately, albeit broadly, define compensation levels specific to the five-state Midwest Region, CFA Society Minnesota once again has executed market-specific primary research with respondents representing Minnesota ( $87 \%$ residing in the Twin Cities metro), North Dakota, South Dakota, Iowa and Wisconsin. The following pages report the impact of a range of variables as well as comparisons to last year's reported data for your interpretation.

## Compensation Comparison Chart

> Data shows professionals who invest their time in attaining advanced degrees and CFA certification tend to have higher compensation levels than those who don't.

# Reported Median Compensation for Those With Less Than 5 Years of Experience for Selected Occupations

| Over 5,000 | 98,000 | 20,000 | 122,500 |

Additional detailed analysis of this compensation breakdown is available upon request to CFA Society Minnesota.
> "Not Applicable" represents the various organizations financial professionals work for that do not manage assets or investments.

## Total Compensation Experience Trend Analysis

Change in Total Compensation

Primary Determinant of Bonus

| Business unit/division performance | $30.8 \%$ |
| :--- | ---: |
| Discretionary | $16.1 \%$ |
| Individual financial contribution | $2.7 \%$ |
| Commissions generated | $2.9 \%$ |
| Individual investment performance | $12 \%$ |
| Other factors related to | $7.7 \%$ |
| individual performance |  |
| Overall firm performance | $19.7 \%$ |
| Not eligible for bonus | $8.1 \%$ |

## Other Forms of Compensation

- Cash bonus mandatorily deferred ..... 13\%
- Company stock ..... 26.6\%
Investment partnership payments ..... 5.9\%
- Phantom share ..... 3.7\%
- Performance units ..... 6.5\%
- Retirement contributions ..... 83.9\%

Reported 2013 total compensation is trending slightly higher than 2012 for most levels of experience. Data from 2015 survey will begin to show more specific trend analysis.

## Total Compensation vs. Compensation Perception

|  | 2013 Median Comp | \% of Respondents who said they <br> were undercompensated but actually <br> were still above median |
| :---: | :---: | :---: |
| Less than 5 years | $\$ 71,000$ | $25.64 \%$ |
| 5 to less than 10 years | $\$ 118,400$ | $30.19 \%$ |
| 10 to less than 20 years | $\$ 187,000$ | $34.55 \%$ |
| $20+$ years | $\$ 277,500$ | $34.78 \%$ |

Approximately $1 / 3$ of respondents who feel they are under compensated are actually above median compensation.

Compensation Satisfaction vs. Likelihood of Looking for New Job

Individuals who don't feel they are fairly compensated are much more likely to be looking for a new job than their counterparts who believe they are fairly compensated.

## Survey Methodology

Method-An online survey was deployed to known financial professionals in the five-state Midwest Region by CFA Society Minnesota. Email subscribers of CFA Society Minnesota and LinkedIn group members were specifically targeted, however the survey was not limited to just these audiences. In addition, this survey was structured so all data gathered was anonymous, with no identifiable information requested.

Respondents-Respondents are financial and investment professionals in the five-state Midwest Region, totaling 572 unique responses.

Timing-The survey was active from April 15, 2014 - May 9, 2014.
Assumptions-The findings from this survey were derived from self-reported data. Because the survey uses sampling methodology and broadly defined positions, survey findings are not necessarily representative of the total population; rather, the survey is designed to provide general information about pay levels within the industry. Earning any degree or professional designation is no guarantee of employment or compensation.

## About CFA Society Minnesota

CFA Society Minnesota is the premier professional organization for investment professionals to connect with Chartered Financial Analysts in the Twin Cities area and throughout the Midwest five-state region. Our mission is to promote and advance the professional excellence, ethical behavior, and fellowship of our members through quality programs, educational offerings, and volunteer opportunities.
